HTML5 details Tag

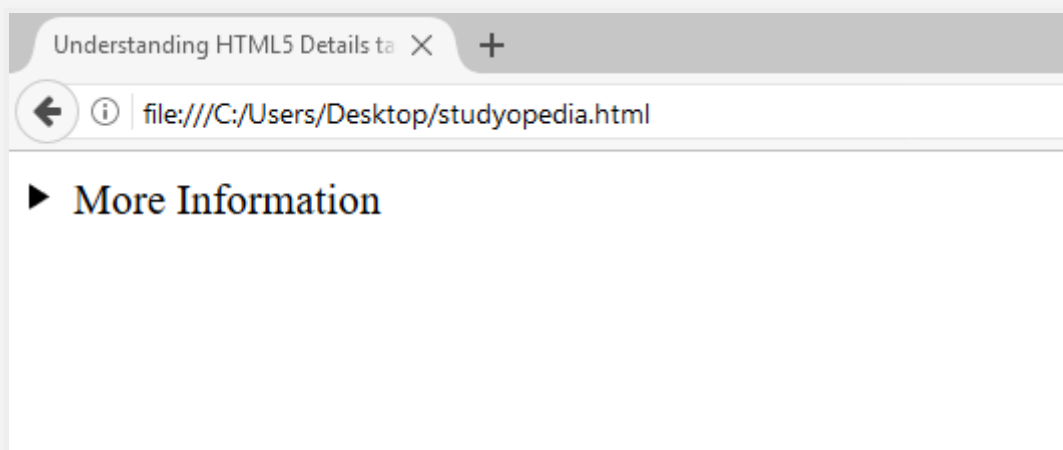

Under the HTML5 **details** tag, you can specify the additional details, which users can view or hide. It creates an outstanding interactive widget which can be opened or closed according to requirement.

```
<!DOCTYPE html>
<html>
<head>
<title>Understanding HTML5 Details tag</title>
</head>
<body>

<details>
  <summary>More Information</summary>
  <p> We provides quizzes also.</p>
  <p>A separate section for Interview Questions is also provide</p>
</details>

</body>
</html>
```

Here's the output showing additional details under **More Information** interactive widget. Initially the following will be visible,

On clicking **More Information** i.e. the interactive widget, the following detailed information is visible. In the same way, add interactive content to the website.

▼ More Information

We provides quizzes also.

A separate section for Interview Questions is also provided.
