progress tag

time tag

### Examples

## HTML Basic Examples

### HTML5 nav Tag

The **HTML5 nav tag** is used to define navigation links. Use the **<nav>** tag when you need to set a group of links, not every link of the document.

#### Example

Here's an example adding navigation links using the **nav** tag,

```
<!DOCTYPE html>
<html>
<head>
<title>Understanding HTML5 nav tag</title>
</head>
<body>
<p>Studyopedia Sections</p>
<nav>
<a href="https://studyopedia.com/tutorials/">Tutorials</a> |
<a href="https://studyopedia.com/quiz/">Quiz</a> |
<a href="https://studyopedia.com/forums/">Forums</a>
</nav>
</body>
</html>
```

Here's the output, we added three sections under the **HTML5 nav** element and now it is looking like a horizontal menu,

Studyopedia Sections

[Tutorials](https://studyopedia.com/tutorials/) | [Quiz](https://studyopedia.com/quiz/) | [Forums](https://studyopedia.com/forums/)

« HTML5 meter Tag

HTML5 output Tag »
