HTML Basic Examples

HTML5 figure Tag

Use the HTML5 **figure** tag if you want to add images, diagrams and other self-contained content on your website. Add a caption too by adding the HTML5 **<figcaption>** tag under the **<figure>** tag.

```
<!DOCTYPE html>
<html>
<head>
<title>Understanding HTML5 Figure Tag</title>
</head>
<body>
<figure>
  
  <figcaption>Figure- Studyopedia Logo</figcaption>
</figure>
</body>
</html>
```

Here's the output, with caption **Figure- Studyopedia Logo**, added using the **figcaption** tag,

Figure- Studyopedia Logo

We have added a logo under the **src** attribute of **img** tag under the

figure tag. Additionally, we added **figcaption** tag also to provide caption to the image we added.

We also added a title to the web page, which would be visible on the page's tab as well as web browsers tab.
