time tag

**Examples**

## HTML Basic Examples

### HTML5 Styles

Style any element using the **style** attribute. Let's say the color of heading is to be changed, and then it can be easily done with HTML5 Styles.

#### Example

Here, we are styling **h1**, **h2**, and **p** element,

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <title>Headings</title>
5  </head>
6  <body>
7    <h1 style="color:red;">Our heading 1</h1>
8    <h2 style="color:green;">Our heading 2</h2>
9
10   <p style="color:blue;">Understanding level 1 and level 2 heading</p>
11
12 </body>
13 </html>
14
15
```

Here's the output,

**Our heading 1**

**Our heading 2**

Understanding level 1 and level 2 heading.

Let's see another example here,

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <title>Style</title>
5  </head>
6  <body>
7    <h1 style="color:green;">Studyopedia</h1>
8    <p style="color:red;">This content is red.</p>
9  </body>
10 </html>
```

Here's the output,

# Studyopedia

This content is red.
