menuitem tag

meter tag

nav tag

output tag

**section tag**

summary tag

progress tag

time tag

### Examples

## HTML Basic Examples

### HTML5 section Tag

As the name tells, the HTML5 **section** tag is used to specify a section in a document. Specify header, footer, lessons, book review, etc in a section.

#### Example

Here's an example showing the usage of the **section** tag to add a separate section on the website,

```
<!DOCTYPE html>
<html>
<head>
<title>Understanding HTML5 section tag</title>
</head>
<body>
<section>
  <h1>Studyopedia</h1>
  <p>Provides learning content.</p>
</section>
</form>
</body>
</html>
```

Here's the output, wherein we have created a separate section to add content.

# Studyopedia

Provides learning content.

« HTML5 progress Tag

HTML5 summary Tag »
