HTML Basic Examples

HTML5 time Tag

As the name tells, the HTML5 **time** tag is used to show human readable date and time. If you want to show the date and time on your website, then use the time tag, for example, meeting date and time, event date, interview date, etc.

Example

Here, we will be showing the meeting date and time as well as office hours,

```
<!DOCTYPE html>
<html>
<head>
<title>Understanding HTML5 Time tag</title>
</head>
<body>
<p>The meeting was on <time
  datetime="2017-02-5T14:00">February 5</time>.</p></p>
<p>Our office hours: <time>09:00</time>AM to <time>06:00</time>
</body>
</html>
```

Here's the output,

The meeting was on February 5.

Our office hours: 09:00AM to 06:00PM

Attributes

datetime— It displays machine readable date and time.

HTML5 summary Tag
